

Real Time Location System Ultra-wideband (UWB) in Warehouse

Benefits

- A complete overview in your warehouse in real time. A well connected warehouse.
- Access control- Enhance security and reduce accidents in workplace via creating geofencing.
- History path and real time location tracking of any moving targets.
- Logistics process optimized based on collected statistics and history records.

A yellow and blue forklift is positioned in the foreground of a large warehouse. The warehouse has high ceilings with exposed steel beams and industrial lighting. In the background, there are tall industrial shelving units filled with boxes and pallets. The floor is a smooth, light-colored concrete. The overall scene is brightly lit, typical of a modern industrial facility.

Real Time Location System **Ultra-wideband (UWB)** in Warehouse

Why UWB

- High Accuracy (30~50cm) & High Position Stability
- High Penetrability, Non-invasiveness to human body & Anti-Interference(RF)
- High speed communication & Low Power Consumption

High Accuracy (30~50cm) & High Position Stability

High Penetrability,
Non-invasiveness to human body
& Anti-Interference(RF)

High speed communication & Low Power Consumption

High Accuracy (30~50cm) & High Position Stability

High Penetrability,
Non-invasiveness to human body
& Anti-Interference(RF)

High speed communication & Low Power Consumption

How it works

Other Applications & Scenarios

Smart Office

Sport Training

Prison

Tunnel and Mine Sh

Museum

Amusement Par

Factory

Hospital
