ERX-H61

Micro ATX Montherboard with Intel® H61 Express Chipset

User's Manual

3rd Ed – 20 January 2015

Part No. E2047RX6102R

Content

1. Getting Started

1.1 Safety Precautions

Warning!

Always completely disconnect the power cord from your chassis whenever you work with the hardware. Do not make connections while the power is on. Sensitive electronic components can be damaged by sudden power surges. Only experienced electronics personnel should open the PC chassis.

Caution!

Always ground yourself to remove any static charge before touching the CPU card. Modern electronic devices are very sensitive to static electric charges. As a safety precaution, use a grounding wrist strap at all times. Place all electronic components in a static-dissipative surface or static-shielded bag when they are not in the chassis.

Always note that improper disassembling action could cause damage to the motherboard. We suggest not removing the heatsink without correct instructions in any circumstance. If you really have to do this, please contact us for further support.

1.2 Packing List

Before you begin installing your single board, please make sure that the following materials have been shipped:

- Rear I/O bracket X 1
- Driver/Utility CD X 1
- Serial ATA Signal Cable X 2

1.3 Specifications

	ERX-H61
Title	Intel® Core™ i7, Core™ i5, Core™ i3, Pentium® /Celeron® Micro ATX Montherboard with Intel® H61 Express Chipset
Features	Intel® LGA1155 socket Supports Core™ i7, Core™ i5, Core™ i3, Pentium® and Celeron® processors
	Intel® H61 Express Chipset
	Two 240-pin DIMM sockets up to 8GB Dual Channel unbuffered DDR3 1066/1333MHz SDRAM
	VGA, DVI -D, HDMI
	Realtek® ALC 662/661 6-Channel HD Audio Codec
	Realtek® RTL8111E PCI-Express Gigabit Ethernet
	1 x PCIex16, 2 x PCIex1, 1 x PCI
	4 STAT II 3.0Gb/s, 8 x USB 2.0 Ports
Specifications	
System	
CPU	Intel® LGA1155 socket Supports Core™ i7, Core™ i5, Core™ i3, Pentium® and Celeron® processors
BIOS	AMI UEFI 1 x 32Mbit Flash ROM BIOS
System Chipset	Intel® H61 Express Chipset
I/O Chip	Nuvoton NCT5577D
System Memory	Two 240-pin DIMM sockets up to 8GB Dual Channel unbuffered DDR3 1066/1333MHz SDRAM
Watchdog Timer	NA
H/W Status Monitor	Monitoring temperature, Voltage, and Fan status.with Auto throttling control
Expansion	1 x PCIex16, 2 x PCIex1, 1 x PCI
I/O	
MIO	4 x STAT II 3.0Gb/s 1 x K/B 1 x Mouse 1 x S/PDIF Out header 1 x RS-232 1 x 24-pin ATX power connector 1 x 8-pin ATX 12V power connector 1 x CPU fan header

	2 x System fan headers 1 x Front panel header 1 x Front panel audio header 1 x Speaker header
USB	8 x USB 2.0 (4 x USB 2.0 Ports ,rear I/O connectors , 4 x USB 2.0 Ports , internal pin-header)
Parallel Port	NA
PS2　KB/MS	1 x PS2 K/B, 1 x PS2 Mouse
DIO	NA
Display	
Chipset	Intel® HD Graphics Media Accelerator 2000/3000 (Based on CPU type) Support for DX10.1 and OpenGL3.0
Resolution	CRT 2048X1536 @ 75 Hz 1 x DVI-D port or 1 x HDMI port 1920 x 1200 @ 60 Hz selection by Jumper (The DVI-D port does not support D-Sub connection by adapter)
Dual Display	VGA+DVI, VGA+HDMI
Audio	
Audio Codec	Realtek ALC 662/661 6-Channel HD Audio Codec
Audio Interface	Mic-in, Line-in, Line out
Ethernet	
LAN Chip	1 x Realtek® RTL8111E PCI-Express Gigabit Ethernet
Ethernet Interface	10/100/1000 Base-Tx Gigabit Ethernet
Mechanical & Environmental	
Power Requirement	+12V/+5V/+5Vsb/+3.3V/-12V
Power Type	ATX
Operating Temp.	0 ~ 50°C (32 ~ 121°F)
Storage Temp	-40 ~ 75°C (-40 ~ 75°F)
Operating Humidity	0 ~ 90% Relative Humidity, Non-condensing
Size (L x W)	Micro ATX 9.6" x 7.28" (244mm x 185mm)
Weight	0.88lbs (0.4kg)

2 Hardware Configuration

2.1 Product Overview

2.1.1 Main board layout
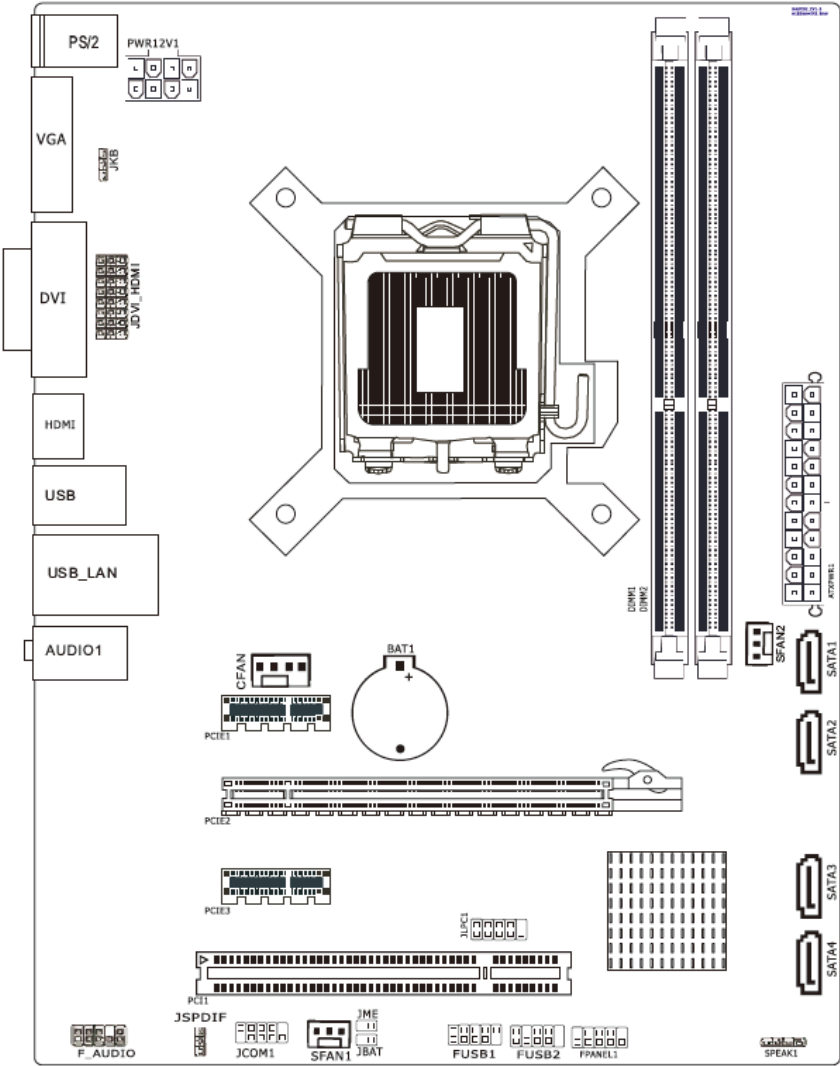

2.1.2 Connecting Rear Panel I/O Devices
2.2 Setting Jumpers & Connectors

2.2.1   Clear CMOS (JBAT)
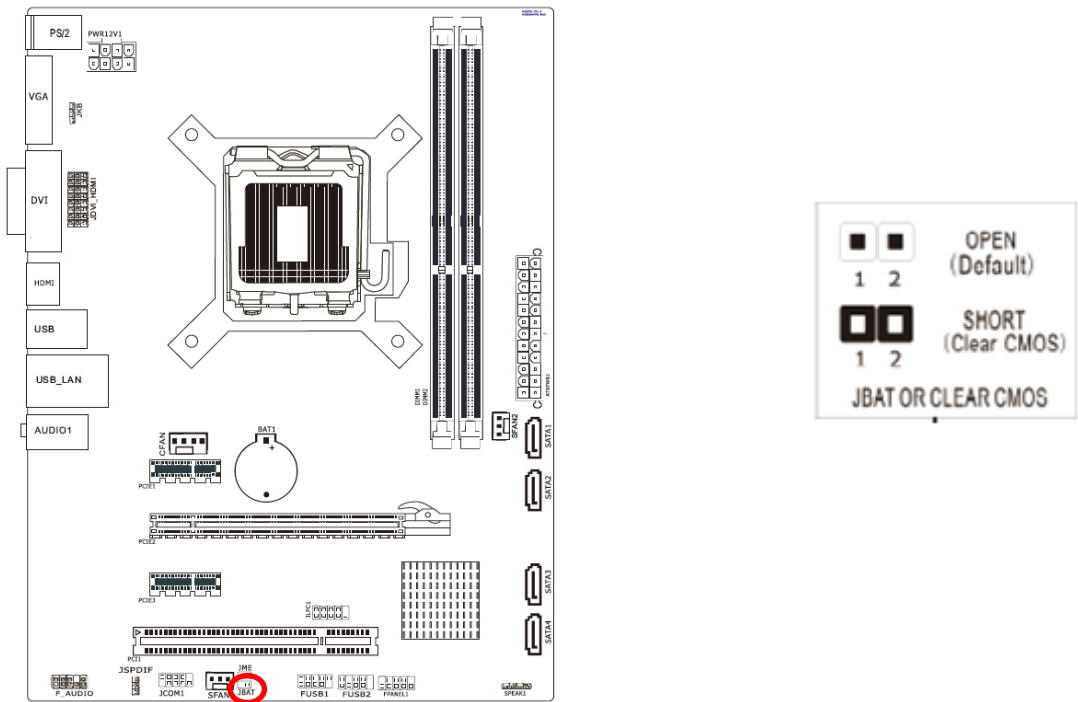

2.2.2   Keyboard Power Function (JKB)
2.2.3 FAN power connectors (CFAN or CFAN1)
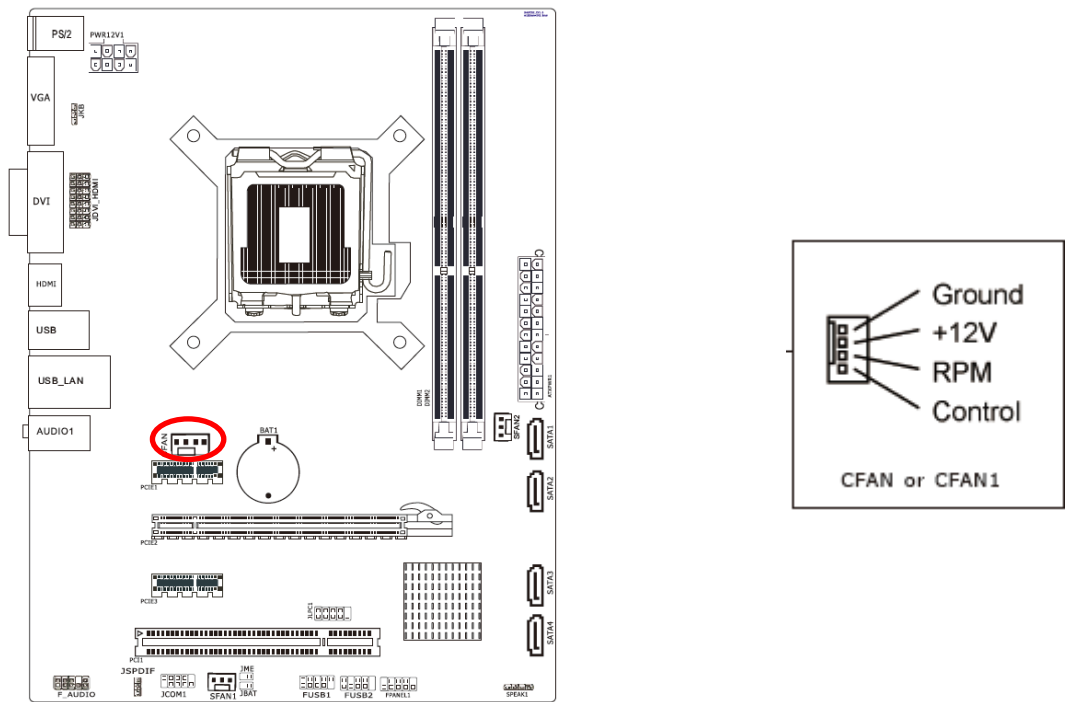

2.2.4 System Fan Power Connector (SFAN1/SFAN2)
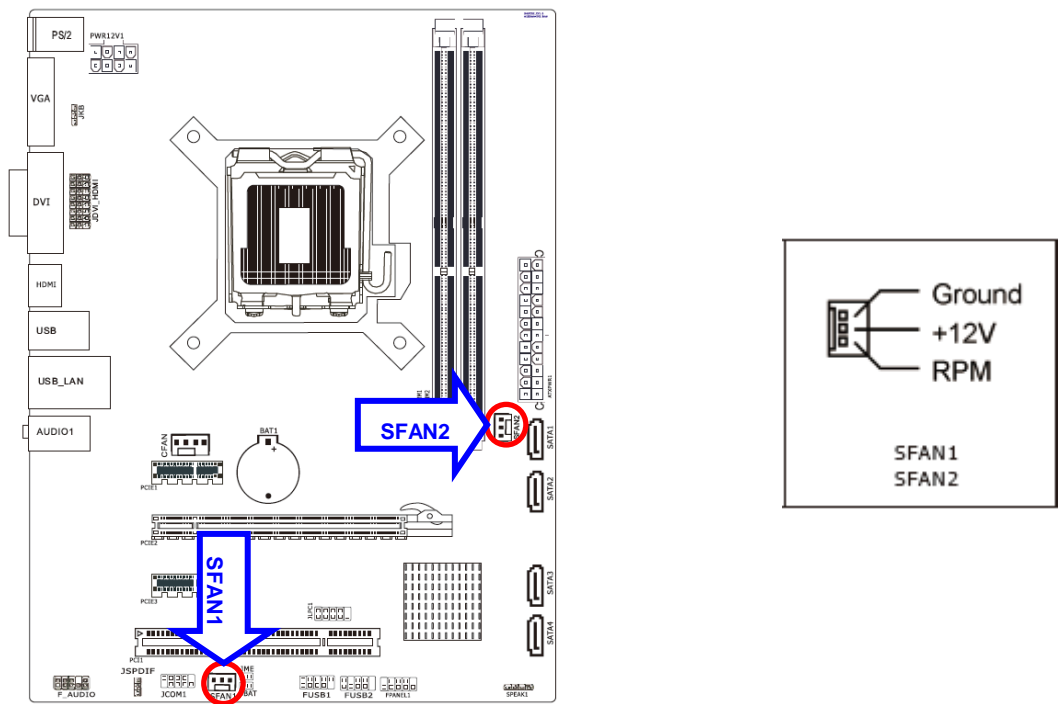

2.2.5 Front Panel Switches (FPANEL1)
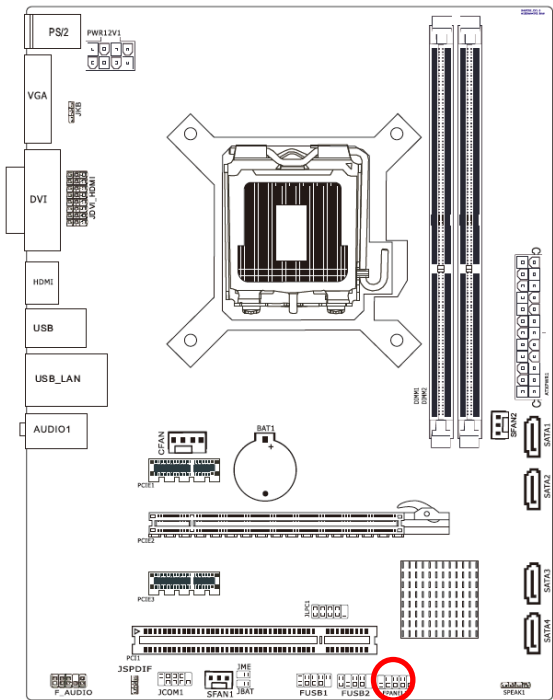

HD_LED (Red): Hard Drive LED connector

RST (Blue): Reset button

PWR_ON (Black): Power button

PWR_LED (Green): Power/Standby LED

2.2.6 Speaker Headers (SPEAK1)

This 4-pin connector connects to the PC buzzer speaker.
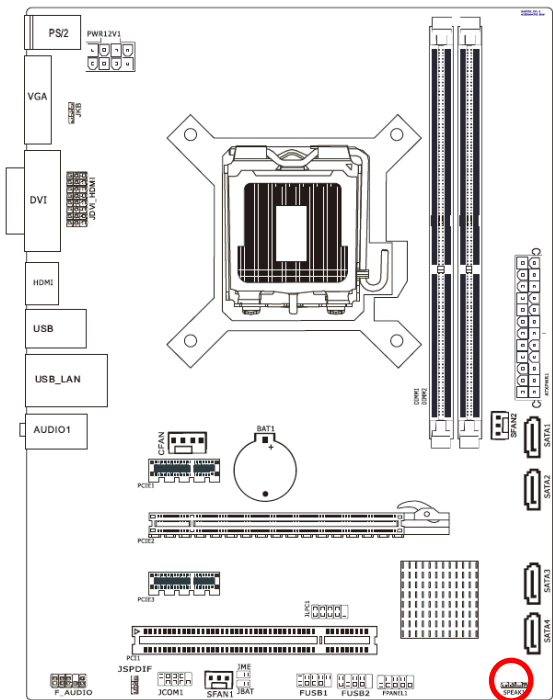

Speaker (Yellow or Black)

Pin No.	1	2	3	4
Pin Define	VCC	NC	NC	GND

2.2.7 Front Panel Audio Connection Header (F_AUDIO)
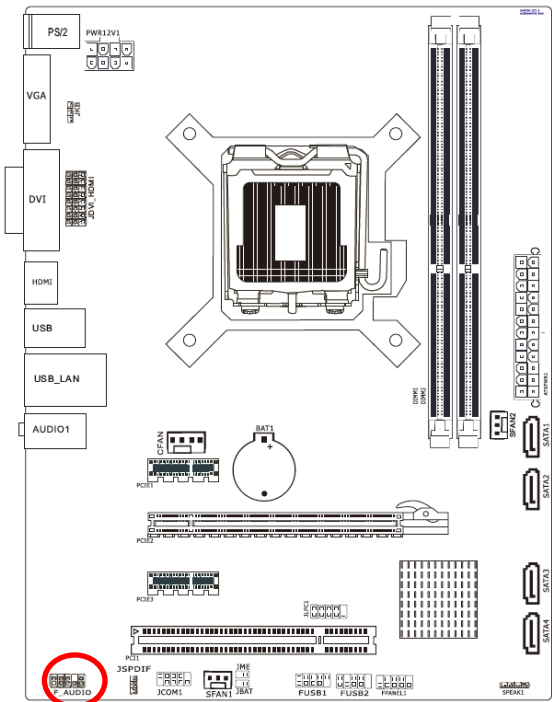

F_AUDIO

Pin No.	Header	HD Audio Definition	AC97 Audio Definition
1	PORT1L	Microphone_Left	Microphone
2	AGND	Ground	Ground
3	PORT1R	Microphone_Right	MIC Power
4	PRESENCE#	-ACZ_DET	N/A
5	PORT2R	Line2_Right	Line out (R)
6	SENSE1_RETURN	AuD_R_Return	N/A
7	SENSE_SEND	FAUDIO_JD	N/A
8	No Pin	N/A	N/A
9	PORT2L	Line2_Left	Line Out(L)
10	SENSE2_RETURN	AuD_L_Return	N/A

2.2.8 Additional USB Ports (FUSB1/FUSB2)
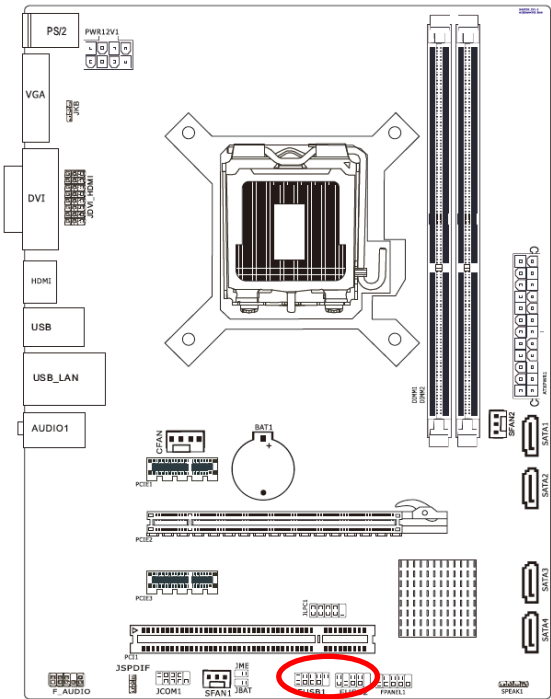

Pin	Pin Assignment	Pin	Pin Assignment
1	VCC	2	VCC
3	Data 0-	4	Data 1-
5	Data 0+	6	Data 1+
7	Ground	8	Ground
9	No Pin	10	NC

2.2.9   JDVI_HDMI and JME connectors (JDVI_HDMI / JME)
JDVI_HDMI Jumper

Pin No.	Definition
Pin1-2	DVI
Pin2-3	HDMI

Shorten #pin 1-2 to DVI device. If can't be detected, please shorten #pin 2-3 to HDMI.
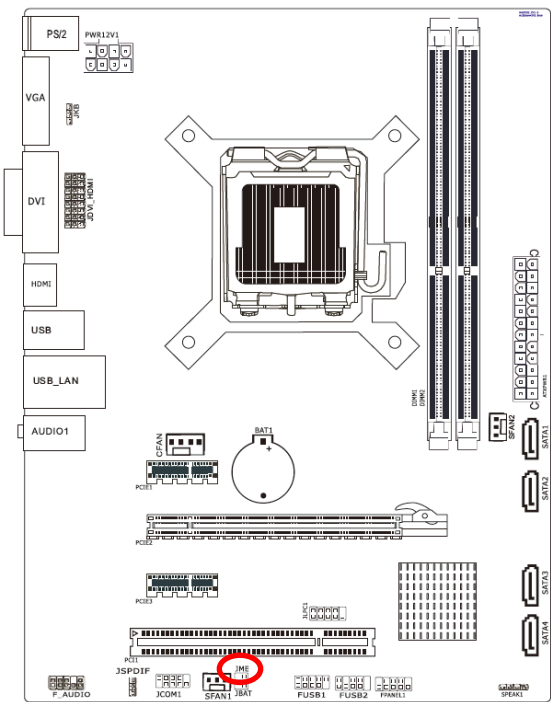

JME: short #pin 1-2 to refresh your ME

2.2.10   S/PDIF Output connector (Optional)
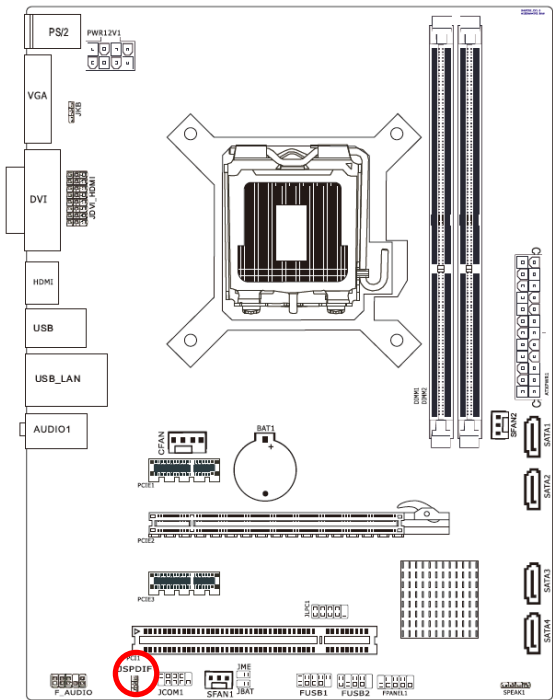

2.2.11   ATX power connector (ATXPWR)
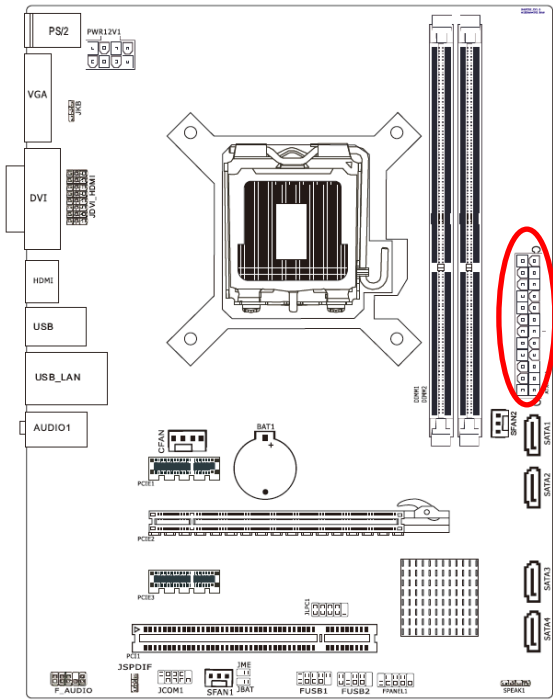

2.2.12   Power connector (PWR12V)

1: Reference for 4 pin PWR12V.   2: Reference for 8 pin PWR12V.
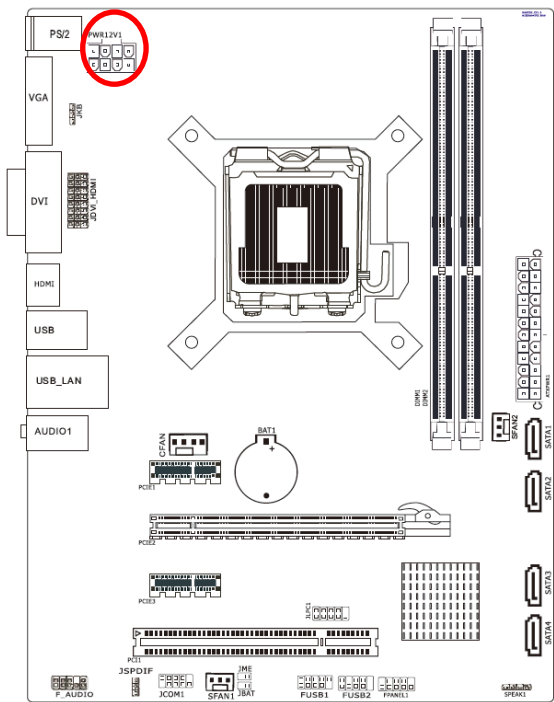

2.2.13   Serial port connector (JCOM1)
Signal	PIN	PIN	Signal
DCD	1	2	RXD
TXD	3	4	DTR
GND	5	6	DSR
RTS	7	8	CTS
RI	9		

3. BIOS Setup

Note: Installation procedures and screen shots in this section are for your reference and may not be exactly the same as shown on your screen.

3.1 Starting Setup

The BIOS is immediately activated when you first power on the computer. The BIOS reads the system information contained in the NVRAM and begins the process of checking out the system and configuring it. When it finishes, the BIOS will seek an operating system on one of the disks and then launch and turn control over to the operating system.

While the BIOS is in control, the Setup program can be activated in one of two ways:

By pressing <Del> immediately after switching the system on, or

By pressing the <Del> key when the following message appears briefly at the bottom of the screen during the POST (Power On Self Test).

Press DEL to enter SETUP

If the message disappears before you respond and you still wish to enter Setup, restart the system to try again by turning it OFF then ON or pressing the "RESET" button on the system case. You may also restart by simultaneously pressing <Ctrl>, <Alt>, and <Delete> keys. If you do not press the keys at the correct time and the system does not boot, an error message will be displayed and you will again be asked to.

Press F1 to Continue, DEL to enter SETUP

3.2 Using Setup

Press F1 to pop up a small help window that describes the appropriate keys to use and the possible selections for the highlighted item.

Please check the following table for the function description of each control key.

Button	Description
↑	Move to previous item
↓	Move to next item
←	Move to the item in the left hand
→	Move to the item in the right hand
Esc key	Main Menu -- Quit and not save changes into CMOS Status Page Setup Menu and Option Page Setup Menu -- Exit current page and return to Main Menu
Enter key	To bring up the selected screen
+ key	Increase the numeric value or make changes
- key	Decrease the numeric value or make changes
F1 key	General help, only for Status Page Setup Menu and Option Page Setup Menu
F7 key	Load the default
F8 key	Fail-Safe Values
F9 key	Optimized Defaults
F10 key	Save & Exit

- **Navigating Through The Menu Bar**
  Use the left and right arrow keys to choose the menu you want to be in.

Note: Some of the navigation keys differ from one screen to another.

- **To Display a Sub Menu**
  Use the arrow keys to move the cursor to the sub menu you want. Then press <Enter>. A "➢" pointer marks all sub menus.

3.3 Getting Help

Press F1 to pop up a small help window that describes the appropriate keys to use and the possible selections for the highlighted item. To exit the Help Window press <Esc> or the F1 key again.

3.4 In Case of Problems

If, after making and saving system changes with Setup, you discover that your computer no longer is able to boot, the BIOS support an override to the NVRAM settings which resets your system to its defaults.

The best advice is to only alter settings which you thoroughly understand. To this end, we strongly recommend that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both Award and your systems manufacturer to provide the absolute maximum performance and reliability. Even a seemingly small change to the chipset setup has the potential for causing you to use the override.

3.5 BIOS setting

3.5.1 Main Menu

Once you enter the BIOS Setup Utility, the Main Menu will appear on the screen. The Main Menu allows you to select from several setup functions and two exit choices. Use the arrow keys to select among the items and press <Enter> to accept and enter the sub-menu.

Note that a brief description of each highlighted selection appears at the bottom of the screen.

Note: The BIOS setup screens shown in this chapter are for reference purposes only, and may not exactly match what you see on your screen.
Visit the Avalue website (www.avalue.com.tw) to download the latest product and BIOS information.

- **BIOS Information**

This Item mainly introduce the BIOS related information, such as the BIOS version, the BIOS manufacturer, the program code versions, establish dates, memory capacity and frequency, choose the BIOS use of language, the setting of the system date and time, access BIOS user level, etc.

- **Memory Information**

Displays the auto-detected system memory.

- **System Date**

This item sets the date you specify(usually the current date0in the format of [Month],[Date], and [Year].

- **System Time**

This item sets the time you specify(usually the current time)in the format of [Hour],[Minute]and [Second].

• **Onboard Lan BootROM Control**

These items can change Boot ROM of the LAN chipset.

• **Launch Storage OpROM**

Setting old equipment storage ROM open and close, optional for Enalbed, Disbaled.

► ACPI Settings

Click <Enter> key to enter its submenu.
• **Enable ACPI Auto Configuration**

Setting the advanced power management configuration, optional for Enalbed, Disbaled.

• **Enable Hibernation**

Enables or disables system ability to hibernate (OS/S4 sleep state). This option may be not effective with some OS. Optional for Enalbed, Disbaled.

• **ACPI Sleep State**

Select the highest ACPI sleep state the system will enter when the suspend button is pressed. Optional for Suspend Disbled、S1(CPU Stop Clock)、S3(Suspend to RAM).

• **Lock legacy Resources**

Enables or disables lock of legacy resources. optional for Enalbed, Disbaled.

‧Press <**Esc**> key to return to "**Advanced**" menu.

► RTC Wake Settings

Click <Enter> key to enter its submenu.

This is CPU configuration options, and show processor working states, such as frequency，64-bit support, maximum/min frequency, stepping, microcode version, code number and hyper-threading technology support, etc.

- **Max Freq Ratio**

This sets the maximum ratio.

- **Set Boot Freq Ratio**

This sets the boot ratio.

- **Hyper-threading**

Setting hyper-threading technology open or closed.

- **Active Processor Cores**

Setting processor core number.

- **Limit CPUID Maxinum**

When set to [Enabled], this item limits the CPUID maximum value to 3, which is usually required for older OS like Windows NT4.0.

・**Execute Disble Bit**

This item appears only for certain processors with the Execute Disable Bit (XD bit) feature. When set to [Enabled], this item allows the processor to prevent data pages from being used by malicious software to execute code and provide memory protection.

・**Hardware Prefetcher**

To turn on/off the Mid Level Cache (L2) streamer prefetcher.

・**Adjacent Cache Line Prefetch**

Setting to turn of/off prefectching of adjcent cache lines.

・**Intel Virtualization Technology**

When enabled, a VMM can utilize the additional hardware capabilities provided by Vanderpool Technology.

・**CPU C3 Report**

Setting CPU C3(ACPI C2) report to OS.

・**CPU C6 Report**

Setting CPU C6(ACPI C3) report to OS.

・**Package C State limit**

Setting of CPU C energy-saving depth.

・**Local x2APIC**

This item enables Local x2APIC. Some OSes do not support this feature.

・**Press <Esc> key to return to "Advanced" menu.**

► USB Configuration

Click <Enter> key to enter its submenu.
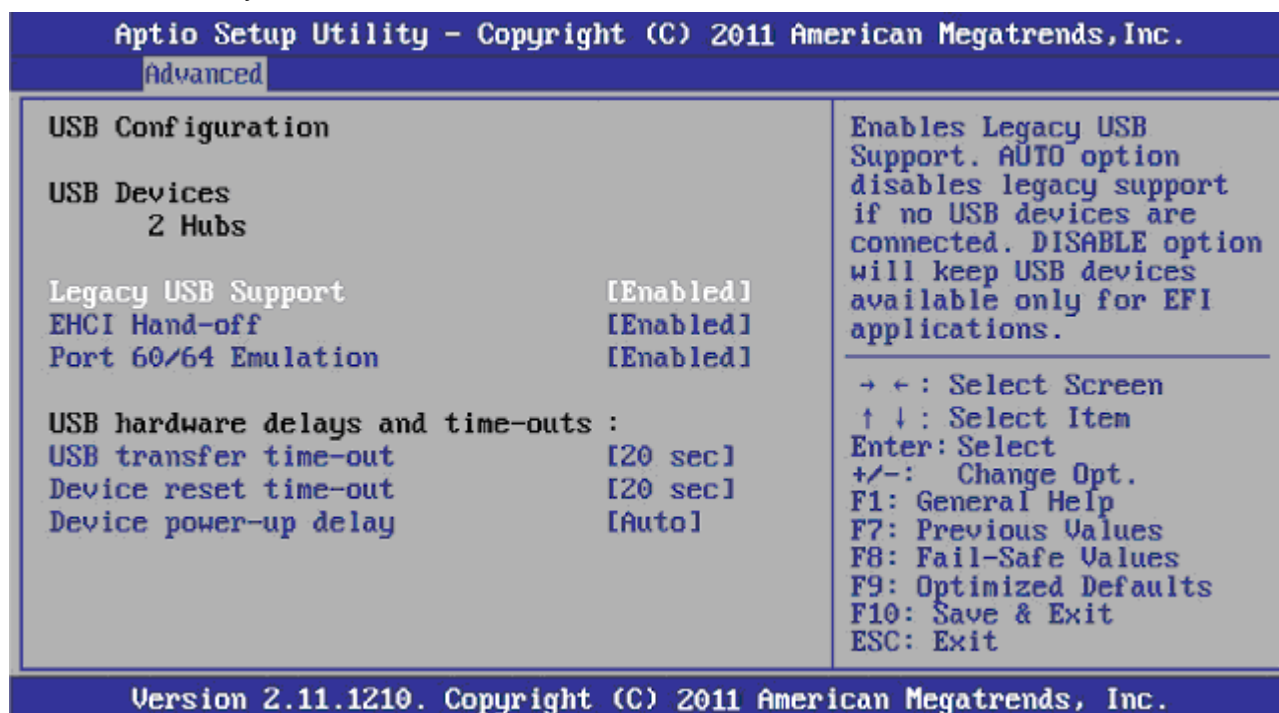

• **Legacy USB Support**

Setting support old input/output devices, such as the mouse, keyboard etc.

• **EHCI Hand-off**

Setting EHCI Hand-Off function.

• **Port 60/64 Emulation**

The item is to increase the USB KBC compatibility.

• **USB transfer time-out**

The time-out value for CONTROL, Bulk, and Interrupt transfers.

• **Device reset time-out**

USB mass storage device Start Unit command time-out.

• **Device power-up delay**

Maximum time the device will take before it properly reports itself to the Host Controller.

・Press <**Esc**> key to return to "**Advanced**" menu.

► **Power Management**

Click <Enter> key to enter its submenu.
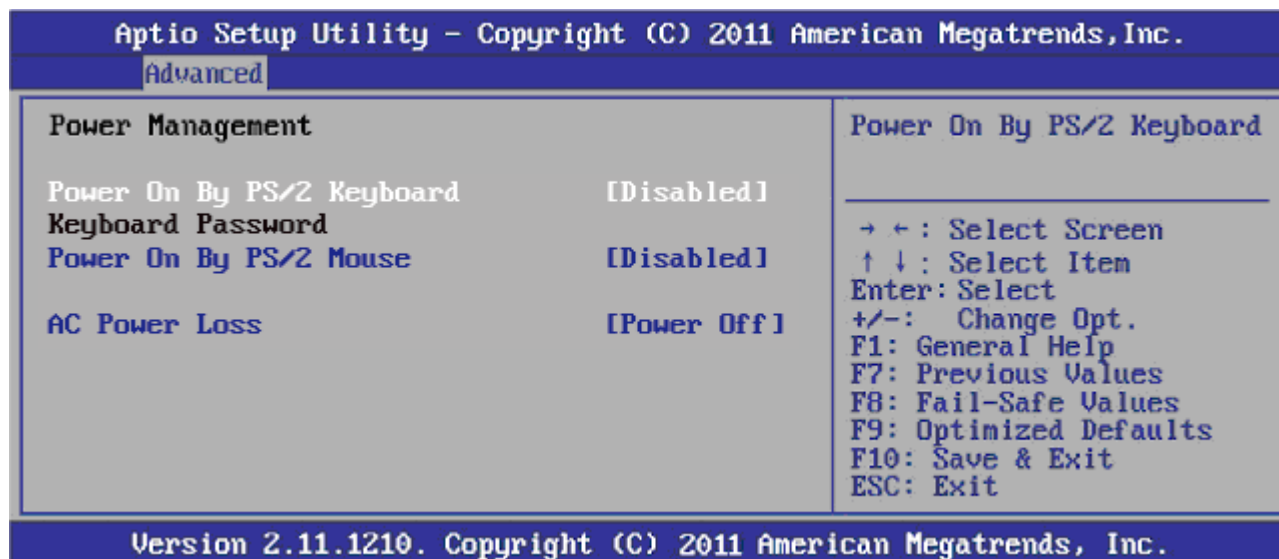

• **Power On By PS/2 Keyboard**

When setting "Password", system can wake up with Password. When setting "AnyKey", system can wake up with any key of keyboard. When setting "Disabled",system can't allow wake up with Keyboard.

Note: if you set the password boot functions, the mainboard boot button will failure.

Note: Don't forget your password. If you forget the password, you will have to open the computer case and clear all information in the NVRAM before you can start up the system. But by doing this, you will have to reset all previously set options.

• **Power On By PS/2 Mouse**

Set the mouse boot function.

ERX-H61 Use's Manual

• AC Power Loss

Setting the system state choice after powre failure. Setting "Power Off", need to press case panel on the Power switch to boot. Setting "Power On", the supply reply directly boot. Setting "Last State", Power reply recovery system State before power off. The default value as "Power Off".

 • Press <**Esc**> key to return to "**Advanced**" menu.

► H/W Monitor

Click <Enter> key to enter its submenu, it will be display hardware health configuration, including System temperature, CPU temperature, FAN speed and all kinds of voltages.
